## EDUCATION

---

### University of Glasgow, Glasgow, United Kingdom

Expected 05/2028

*Third Year Bachelor of Science (Hons) in Computing Science*

- Relevant Coursework: Python, Java, SQL, Databases, HCI, Algorithms and Data Structures, OOPs, Networks and Operating Systems, Web Development, Systems Programming, C++, C
- Grade: 18/22 (On track for First Class Honours)

## EXPERIENCE

---

### Pastéis Lisboa

20/11/2025 - Present

*Bakery Assistant / Kitchen Porter*

- Maintained high standards of cleanliness and hygiene across all bakery and kitchen areas to the standard required by the company and EHO.
- Supported bakers in the production of Pasteis de Nata, including food prep and assisted front-of-house staff with product handling and display.
- Worked collaboratively with the team to meet daily targets, manage cleaning supplies, and maintain a safe, efficient, and well-organised environment.

### Deutsche Bank Women in Technology, Data & Innovation Insight Event

*Insight Programme, London Office*

10/06/2026

- Gained insight into how diverse, cross-functional teams collaborate within a professional software engineering environment
- Learned how teams are structured and managed in a large corporate setting, and the technologies used to support collaboration across large teams

### JP Morgan Chase, Spring into Software Engineering

13/04/2026 - 16/04/2026

*Insight Programme, Glasgow Office*

- Gained hands-on exposure to enterprise-scale software engineering, cloud infrastructure, and development workflows during time at JPMorgan Chase.
- Code for Good Hackathon (National Fire Chiefs Council): developed an intelligent early-warning system monitoring elderly residents' daily safety habits in real time, escalating risks through a tiered alert chain from carer notifications to fire service intervention
- Tech Stack: Python, FastAPI, PostgreSQL, Cryptography, HTML, JavaScript, CSS, FetchAPI

### Inspirit AI Course

02/07/2021 - 02/08/2021

- Developed a BERT-based NLP model for intent detection and entity extraction from natural language commands
- Implemented joint sequence and token classification using BIO tagging, tokenization, and attention masking
- Gained experience in deep learning, transformer models, fine-tuning, and evaluating large language model limitations

### National University of Singapore & Hewlett Packard Enterprise

01/06/2021 - 11/09/2021

*Intern*

- Built a strong foundation in Python programming, probability, Bayes' theorem, and mathematics for ML (linear algebra, regression), applying algorithms including decision trees, SVMs, and MLPs, and evaluating performance using confusion matrices, precision, and recall
- Applied ML techniques to a breast cancer prediction project, classifying tumours as malignant or benign using SVM and MLP, and developed a real-time flood prediction model in Azure ML Studio using precipitation data for early alerts and disaster prevention support

## LEADERSHIP

---

### University of Glasgow Robotics Society

04/01/2026 - Present

*Secretary*

- Preparing meeting agendas with the President and maintaining accurate minutes, attendance records, and society communications
- Coordinating meetings, events and workshops for members interested in robotics and autonomous systems
- Liaising with the SRC to ensure society membership is accurately displayed on the website and reporting key correspondence to the committee

#### **University of Glasgow Peer Mentoring Scheme**

30/09/2025 - Present

##### *Mentor*

- Mentoring first-year and fast-track second-year students on study strategies, goal setting, and academic transition, with regular check-ins to monitor progress and engagement

#### **University of Glasgow FinTech Society**

22/09/2025 - 30/05/2026

##### *Welfare Officer*

- Supported the wellbeing of society members, ensuring an inclusive and supportive environment across all events and activities.
- Acted as a point of contact for members with welfare concerns, signposting to university support services where needed.
- Collaborated with the committee to promote mental health awareness and a positive culture within the society.

### **PROJECTS**

---

#### **Personal Portfolio Website**

02/09/2026

- Designed and built a personal portfolio using React, TypeScript and Tailwind CSS with hand-written CSS custom properties, featuring a distinctive interactive theme.

#### **When In Rome**

30/03/2026

##### *Group Project (Django Web Application)*

- Designed and built a Django web application that lets tourists discover and share local food and activity recommendations across cities
- Modelled the relational database (Users, Recommendations, Reviews, Upvotes, Follows) and implemented features including upvote-driven trending recommendations, public user profiles, and a follow system
- Deployed the application to PythonAnywhere

### **HACKATHONS & COMPETITIONS**

---

#### **Glasgow 850 GameJam**

20/10/2025 - 05/11/2025

- Co-developed "PubCrawl Simulator" in Godot, contributing to game logic and backend development

#### **Do You Have The GUTS Hackathon**

25/10/2025 - 26/10/2025

##### *Honourable Mention from Morgan Stanley*

- Built a Godot simulation with randomised events in which a company balances profits with a net zero goal by adjusting commitment to environmental policies and investing in green technologies

#### **Microsoft Sustainability Hackathon**

12/05/2023

##### *Top 10 Finalists*

- Created a carbon emissions calculator for applications using Angular, Spring Boot, and Azure ML

### **TECHNICAL SKILLS**

---

- Languages: C++, Java, Python, TypeScript, SQL, HTML, CSS, Assembly Language (Sigma 16)
- Frameworks & Tools: React 19, Angular, Spring Boot, Django, Godot, FastAPI
- AI & Data: Python & AI Libraries, Azure ML Studio, Neural Networks & BERT (NLP), Data Analysis & Regression, SVM, Clustering & Classification
